

C L A I M S

We Claim:

- 1 1. A method of utilizing a push model to provide access to a message list in one or
2 more of a voice, a fax, an e-mail and a unified mailbox through a wireless network, the
3 method comprising the steps of:
 - 4 a. automatically receiving an updated mailbox content list from a server through a
5 wireless network;
 - 6 b. scrolling through the updated mailbox content list with a wireless device;
 - 7 c. forming a communication link through the wireless network thereby linking the
8 wireless device and the server;
 - 9 d. selectively receiving a message from the server; and
 - 10 e. providing the message to a user.
- 1 2. The method of Claim 1 further comprising a new message notification, including
2 the updated content list.
- 1 3. The method of Claim 1 wherein the wireless network has a low data-bandwidth
2 and a high data-latency.
- 1 4. The method of Claim 1 further comprising the step of the user scrolling through
2 the updated mailbox content list without accessing the wireless network.
- 1 5. The method of Claim 1 further comprising the step of the user issuing the
2 command using the wireless device.
- 1 6. The method of Claim 1 further comprising the step of the server playing the
2 message according to a command given by the user.
- 1 7. A system for providing access to a message list in one or more of a voice, a fax,
2 an e-mail and a unified mailbox through a wireless network comprising:

3 a. a wireless device;
4 b. a server; and
5 c. a wireless network linking the wireless device with the server.

1 8. The system of Claim 7 wherein the wireless network has a low data bandwidth
2 and a high data latency.

1 9. The system of Claim 7 wherein a new message notification and an updated
2 mailbox content list are sent over the wireless network from the server to the wireless
3 device.

1 10. The system of Claim 7 wherein after being sent by the server, the new message
2 notification and the updated content list can be viewed by a user with the wireless device.

1 11. The system of Claim 7 wherein the user may scroll through the updated mailbox
2 content list with the wireless device.

1 12. The system of Claim 7 wherein the user selects a message by issuing a command
2 to the server.

1 13. The system of Claim 7 wherein the server delivers the message selected by the
2 user and the message is played for the user by the wireless device.

1 14. A method of providing access to a message list in one or more of a voice, a fax, an
2 e-mail or a unified mailbox through a wireless network, the method comprising the steps
3 of:
4 a. automatically receiving through a wireless network a new message notification
5 and an updated mailbox content list from a server;
6 b. remotely scrolling through the updated mailbox content list using a wireless
7 device;
8 c. forming a communication link between the wireless device and the server; and
9 d. receiving and presenting a message from the server.

1 15. The method of Claim 14 wherein the wireless network has a low data-bandwidth
2 and a high data-latency.

1 16. The method of Claim 14 further comprising the step of a user scrolling through
2 the updated mailbox content list without accessing the data network.

1 17. The method of Claim 14 further comprising the step of the user issuing the
2 command using the wireless device.

1 18. The method of Claim 14 further comprising the step of the server playing the
2 message according to a command given by the user.

1 19. A system for providing access to a message list in one or more of a voice, a fax or
2 a unified mailbox through a wireless network, the system comprising:

- a. means for automatically receiving an updated mailbox content list from a server
through a wireless network;
- b. means for scrolling through the updated mailbox content list with a wireless
device;
- c. means for forming a communication link through the wireless network thereby
linking the wireless device and the server;
- d. means for selectively receiving a message from the server; and
- d. means for providing the message to a user.

1 20. The system of Claim 19 wherein a new message notification includes the updated
2 mailbox content list.

1 21. The system of Claim 19 wherein the wireless network has a low bandwidth and a
2 high latency.

1 22. The system of Claim 19 wherein the user scrolls through the updated mailbox
2 content list without accessing the wireless network.

1 23. The system of Claim 19 wherein the user issues a command using the wireless
2 device.

1 24. The system of Claim 19 wherein the server plays the message according to the
2 command given by the user.
